

Exercitii PCLP2 - L13

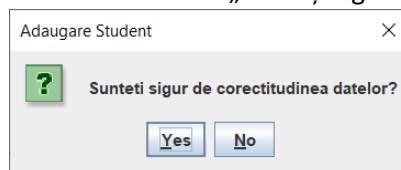

EX1.

Realizați o interfață grafică pentru introducerea datelor unor studenți: nume și prenume, specializare.

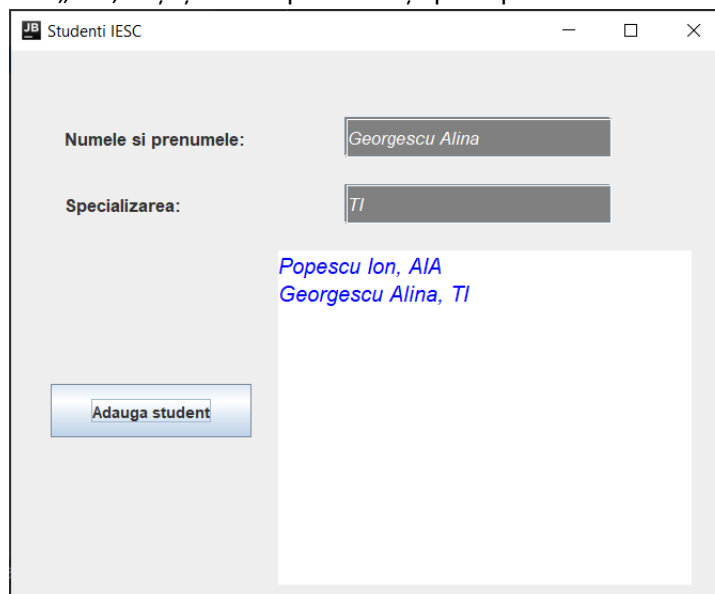

The screenshot shows a window titled "Studenti IESC". It contains two text input fields: "Numele si prenumele:" and "Specializarea:". Below the "Specializarea:" field is a large empty rectangular area. At the bottom left, there is a button labeled "Adauga student".

La apăsarea butonului utilizatorul va fi întrebat: „Sunteți sigur de corectitudinea datelor?”.

The dialog box is titled "Adaugare Student" and contains a green question mark icon. The text inside says "Sunteti sigur de corectitudinea datelor?". At the bottom, there are two buttons: "Yes" and "No".

Dacă răspunsul este „da”, afișați datele pe interfața principală.

The screenshot shows the same window as before, but now the "Numele si prenumele:" field contains the text "Georgescu Alina" and the "Specializarea:" field contains "TI". The large rectangular area now displays the text "Popescu Ion, AIA" and "Georgescu Alina, TI" in blue. The "Adauga student" button is still present at the bottom left.
